Are you looking for those four fields only? (Item name, description, model number, vendor?) Do you want the list from the current inventory? Or do you want the entire database?

I've cc'd Carlton on this request who will prepare the export to Excel.

I will need to check with Patti Lautner on this and see if she can get this information. When do you need this? Will the UMass stockroom program still run the update process with the new Purchasing program?
